— DEAL TERMS

- 1 Flat, as-is price.** \$5,000 for the whole thing — no drawn-out negotiation, no line-item haggling.
- 2 One payment on transfer.** Repo, IP, logo, domain, store accounts and user data hand over on receipt.
- 3 Handover included.** Walkthrough of the code, backend and deployment so you can run it solo.
- 4 Support optional.** Further feature work or maintenance available on an hourly or monthly basis, quoted on request.

Why so far below build cost? The app is pre-launch with an early user base, and it goes to a known buyer rather than an open marketplace. This is a friendly price to get it into good hands quickly — the buyer inherits ~\$14k+ of finished work for \$5,000.
